

2015 – 2016

Legislative Scorecard

**Visit our interactive Scorecard at
cvsc.org/scorecard**

Introduction

Welcome to the 2015-2016 Conservation Scorecard, your window into the South Carolina State General Assembly and the actions taken – or not taken – to protect the South Carolina you love.

The State General Assembly can be complicated and confusing. Our job is to show you who is working for – or against – the protection of our air, land, and water. We score how House and Senate members voted on bills important to the conservation community. In cases where there was confusion about an issue or a lack of consensus from the conservation community, we do not include those votes in the score chart.

Conservationists prevailed on many important issues in the 2015-2016 session and the scores are generally high. Statistical scores, however, are an incomplete report on the legislative record. Who sponsored the good and bad bills? Who fought in Committee? Who worked behind the scenes or spoke on the floor? To add some additional context, we are including a bump (plus or minus) for bill sponsorships. Not only does this show who doesn't have your interests at heart, it highlights who is going the extra mile for conservation.

We've included a key for easy reading:

+ : Pro-conservation vote

- : Anti-conservation vote

NV: No Vote – Failed to vote on the bill (counted as a negative)

EA: Excused Absence (not counted as a negative because the legislator was excused in the journal)

NA: Legislator was not a member of the body at the time of the vote

Vote Descriptions

Take Palmetto Pride Where You Live Act

H.3035, introduced by **Rep. Cobb-Hunter, Long, Burns**, and others, passed unanimously, 118-0 in the House and 38-0 in the Senate. The bill improves litter control coordination between state and local agencies by evaluating successful public and private programs and campaigns, creating a strategic plan to reduce litter, and identifying metrics for measuring success.

Pro-Conservation Bill

Status: Passed

Solar Tax Credit

Rep. Dillard, Govan, Mitchell, and Cobb-Hunter introduced **H.3874**, which allows for income tax credits to be granted to individuals or businesses that construct, purchase, or lease solar energy properties or geothermal machinery equipment in South Carolina. This bill passed 99-4 in the House before passing 94-8 in Senate in 2015.

Pro-Conservation Bill

Status: Passed

Coal Ash Disposal

Coal ash is a dangerous waste product of coal-fired power plants containing toxic arsenic and lead that can cause breathing problems and contaminate groundwater, lakes, and streams— threatening the health of our families and the environment. An out of state waste company tried to dump tons of coal ash in a Pickens County landfill intended for construction waste like tree stumps and old cement. **Representative David Hiott** (House Agriculture & Natural

Resources Committee Chair), **Senator Larry Martin** (Senate Judiciary Chair), **Representative Gary Clary**, and **Representative Neal Collins** responded to citizen concerns about the threat of coal ash pollution and introduced bills to prohibit coal ash from being dumped in class 2 (unlined) landfills and require disposal in safer class 3 landfills. The Senate version of the bill (**S.1061**) was ultimately adopted with unanimous support in both chambers, with the House passing the bill 101-1 and 39-0 in the Senate.

Pro-Conservation Bill

Status: Passed

Shoreline Management

After almost a decade of work, the recommendations of DHEC's Blue Ribbon Committee (BRC) on Shoreline Management were finally codified into state law in the last week of the legislative session. Most importantly, attempts by developers to sabotage the bill for their own gain were defeated year after year, most notably in a battle over development on the fragile sands of Captain Sams Spit.

Among other things, the passage of **S.139** (similar to **Rep. Herbkersman's H.3378**) establishes a permanent baseline for seaward development. Instead of allowing the building line on the front beach to move seaward, as has been the case for 25 years — allowing houses to be built during temporary accretion cycles — the line will be permanently set in 2017. This means construction along our coast will never be able to move closer to the ocean. This not only protects our beaches from erosion, it also protects our communities from the repercussions of irresponsible construction projects.

We are grateful for **Representatives Bill Herbkersman, Peter McCoy, Kirkman Finlay, James Smith, Leon Stavrinakis, Russell Ott, Doug Brannon, and Weston Newton** for leading these efforts in the House. As well as **Senators Ray Cleary, Marlon Kimpson, Chip Campsen, John Courson, Thomas McElveen, and John Matthews** who led on this issue in the Senate. These legislators stood up for our state, and we thank them for their hard work! In the end, the bill passed unanimously in the House 114-0 and 39-0 in the Senate.

Pro-Conservation Bill

Status: Passed

2015 Conservation Bank Funding

Although the Board of Economic Advisors (BEA) formula estimated the Bank's revenues at approximately \$15-16 million, the House attempted to cap funding at \$9.8 million (101-9) with **H.3701 sec. 53**, while the Senate authorized \$22 million (42-3). In addition, **Representatives J.E. Smith and Robert Brown** introduced a friendly amendment, **H.3701 sec. 53, amendment 7a**, which would have increased funding for the Conservation Bank. This was inevitably tabled in the House chamber, however, by Rep. Brian White with a vote of 54-50. In the end, the Budget Conference Committee (**Senators Leatherman, Setzler, and Peeler; Representatives White, Pitts, and Clyburn**) awarded \$15M in funding for the Conservation Bank.

Pro-Conservation Bill and Amendment

Status: Passed (Bill), Failed (Amendment)

2016 Conservation Bank Funding

In 2016, we gathered a supermajority of co-sponsors to **Rep. Bingham's** Conservation Bank reauthorization bill, **H.4945**, which mirrored **Senator Campsen's** bill (**S.519**). These companion bills would have eliminated the sunset provision, improved the death clause, and increased funding by \$0.05 per deed stamp recording fee (as recommended by the Wetlands Task Force). Neither of the reauthorization bills received a hearing, but we expect that they will be re-introduced in the 2017-2018 session. We will need a strong grassroots campaign to pass them before the Bank authorization expires in 2018.

With **H.5001**, the 2016 Budget Conference Committee (**Senators Leatherman, Davis, and Sheheen; plus Representatives White, Hosey, and Herbkersman**) settled on a \$15M funding level for the Conservation Bank for FY 2016-2017, a compromise between the House-authorization of \$10M and the Senate's \$20M.

The Conference agreement, however, included two Senate-sponsored budget provisos that designated \$3M from the Bank to DNR for matching federal funds for wildlife habitat restoration and wetlands conservation. The Conservation Bank will have a net of \$12M available for awards in the upcoming fiscal year. The budget bill passed in the House 96-3 and 40-2 in the Senate.

Pro-Conservation Bill

Status: Bill Failed, Budget Passed

Lake Conestee Nature Park

After about two years of pursuing recognition of Lake Conestee Nature Park as a "Wildlife Sanctuary" in state statutes (like Francis Beidler Forest and numerous other properties around the state), our friends at the Conestee Foundation successfully passed **H.4743** in both chambers, passing 84-0 in the House and 43-9 in the Senate. **Representatives Eric Bedingfield** and **Chandra Dillard** introduced the bill. This victory is long overdue and we're happy to see the Park get this deserved recognition.

Pro-Conservation Bill

Status: Passed

The Dylan Paul Mitchell Bicycle and Pedestrian Safety Act - 2015

H.3909 was developed by the Palmetto Cycling Coalition to promote bike and pedestrian safety in South Carolina. The bill dealt with technical issues not currently addressed in state law and cleaned up outdated and confusing language affecting bicyclists and pedestrians.

The bill had the support of the Palmetto Cycling Coalition, AARP, Bosch Industries, the Coastal Conservation League, SC Children's Trust and numerous other national and state-level cycling organizations, but was stalled in the Senate because of opposition to increased penalties for motorists who cause the death of a cyclist or pedestrian. When this was removed, the bill moved forward with a few days left in the session. **Senator Corbin** objected to the bill for two weeks, but it finally passed the Senate on the last day of the session. When the House took it up (with only thirty minutes left until adjournment), the bill looked ripe for passage. **Rep. Loftis**, however, waited until the final minutes of session to use parliamentary procedures to effectively kill the bill.

Pro-Conservation Bill

Status: Failed

Bonus Bills - stalled and un-scored bills that determine sponsorship bumps:

- **H.3564, Surface Water Withdrawal Reform:** In 2015, **Reps. J. Smith, Taylor, Hodges, Herbkersman, Newton, G.M. Smith, Merrill, Bamberg, Ballentine, R.L. Brown, Henderson, and Whipper** sponsored **H.3564**, which would have removed a special exemption allowing agricultural users to apply for a registration instead of permit to withdraw more than 3 million gallons a month from surface waters.
- **H.3899, Barnwell:** **Reps. Limehouse, Quinn, Hicks, Sottile, and Toole** introduced **H.3899** in 2015, which would have affirmed the Atlantic Compact, limiting additional low-level radioactive waste at the Barnwell site.
- **H.4565, Dam Safety Reform:** **Reps. Lucas, Bales, Clyburn, Hosey, Henegan**, and many others supported **H.4565**, the Dams and Reservoirs Safety Act. This legislation was in response to the historic flooding and dam failures of October 2015 and intended to strengthen the existing dam safety program at DHEC.

- [H.5141/S.1231, Lead Wheel Weight Ban](#): **Rep. Bruce Bannister** and **Senators Turner and Shealy**, sponsored bills **H.5141** and **S.1231**, advocating for a ban on using or selling lead wheel weights that can negatively impact water quality when they fall off wheels and degrade.
- [H.5207/H.5294, Bottle Bill](#): **Reps. Tommy Pope and James Smith** introduced the Bottle Bill (**H.5207**) in 2016 to allow local jurisdictions to implement a bottle deposit program that would incentivize recycling with the help of the Department of Revenue and DHEC. **H.5294**, supported by **Rep. Bowers, Herbkerman, and Newton**, was also introduced and is very similar in nature to **H.5207**.
- [H.4984, Environmental Bill of Rights](#): **Reps. Neal, Henegan, Whipper, Gilliard, Clyburn, Hosey, Mack, McKnight, and Norrell** introduced **H.4984**, an environmental bill of rights that would have allowed local governments to enact environmental regulations more protective than state laws.
- [H.4985, Citizens' Environmental Property Rights](#): **Reps. Neal, Henegan, Whipper, Gilliard, Clyburn, Hosey, Mack, and McKnight** also supported **H. 4985**, a bill that would have established citizens' environmental property rights, requiring permit applicants to notify all surrounding land owners of the pending application. It also provided protections against trespassing for surveying.
- [S.166, Offshore Wind](#): **Reps. Clemmons, Duckworth, and George** and **Senators Hembree and Grooms** were prominent supporters of **H.3026** and **S.166**, which provided incentives and funding for offshore wind research and development.
- [S.58, Surface Water Reform](#): **Senator Campsen** introduced the Surface Water Stewardship Act in 2015, which attempted to reform the Surface Water Stewardship Act of 2010 by limiting the registration process for agricultural users and adjusting the threshold required for a permit to better protect our streams, rivers, and local agriculture.
- [S.522/ H.3797, Dorchester](#): **Senator Bennett** and **Representative Murphy** threatened to eliminate all protections afforded by the Coastal Zone Management Program to around 90% of Dorchester County through the Coastal Tidelands and Wetlands bill (**S.522**). Of the areas currently under protection, at least 30% contain critical wetlands of some kind, including portions of the Ashley and Edisto rivers.
- [H.4206, Mine Blasting](#): **Reps. Kennedy, Sottile, Johnson, Pope**, and many others rallied support for the Mine Operator bill (**H.4206**), which would have strengthened mining laws by setting the minimum distance that a mine operator must maintain from communities while blasting, reducing noise pollution and protecting citizens from mining activities.
- [S.165/H.4011/H.5090, Automatic Stay](#): **S.165** (supported by **Sens. Hembree, Turner, Bennett, and Massey**) and **H.4011** (**Reps. Clemmons, Crawford, and many others**) and **H.5090** (**Reps. Hiott, Anderson, Crawford, Clemmons** and many others) would have eliminated the existing "automatic stay" law that serves to prevent irreparable damage while factual and legal issues surrounding DHEC permits are resolved.
- [S.228/H.3370, DHEC Board Review](#): **S.228** was supported by **Sen. Campbell** and **H.3370** was introduced by **Reps. Pitts, Burns, and V.S. Moss**; both were blocked in 2015 and 2016. These bills would have forced DHEC permit appeals to go straight to the Administrative Law Court (ALC), significantly increasing legal expenses for everyone and reducing the DHEC Board's accountability.
- [S.1062/H.5093, Immunity for Industry](#): **Senators Campbell, Massey, Rep. Forrester**, and many others supported **S.1062** and **H.5093**, which would have given industries immunity from nuisance claims, leaving neighboring communities susceptible to conditions that could damage property values and lower quality of living.
- [S.229/H.3371/H.4640, Polluter Amnesty](#): **Representative Lucas** offered support for **H.4640**, along with **Reps. Hiott, Burns, and V.S. Moss** for **H.3371**, companion bills to **S.229**, which would have eliminated the citizens' "past right of action" under the Pollution Control Act. **S.229** was introduced by **Senator Campbell and Turner**, and sought to amend the Pollution Control Act in order to eliminate the ability of citizens to sue for the cleanup

of past, unpermitted pollution. We did not score this vote because we asked Senators to support a compromise amendment introduced by **Senator Hutto**.

- **H. 4793, Plastic Bag Ban**: Led by **Reps. Lucas and Bedingfield**, legislators in the House introduced legislation (**H.4793**) to “ban” plastic bag bans. This bill targeted local governments by preventing towns and cities from enacting their own local waste-reduction solutions, including plastic bag ordinances.
- **S.626 Renewable Energy Property Tax Reform**: **Senators Gregory, Hayes and Reese** introduced **S.626**, which provided property tax exemptions for the growing renewable energy sector in South Carolina. Although the bill did not pass (mostly because of interference by the Manufacturers Alliance), the House and Senate chambers both voted on this bill, passing in the Senate 32-0 and ultimately failing in the House 54-36. We did not score this bill because it was independently lobbied for by the solar business community, but we hope to work on it next year.

SENATE	"Lifetime" Senate scores have been calculated using only the 2011-2015 data. Not enough votes were recorded prior to 2011 to enable statistical scoring. Also, the Senate normally votes only after reaching consensus, leading to many 100% scores.
