

2019 – 2020

Legislative Scorecard

**Visit our interactive Scorecard at
cvsc.org/scorecard**

Introduction

Welcome to the 2019-2020 Conservation Scorecard, your window into the South Carolina State General Assembly and the actions taken – or not taken – to protect the South Carolina you love.

We know that the State General Assembly can be complicated and confusing. That’s why we create this Scorecard – to show you who is working for or against the protection of our air, land, and water.

In the Scorecard, CVSC identifies how House and Senate members voted on bills important to the conservation community. In most cases, there is broad consensus among the conservation community on priority legislation, which is clearly communicated to lawmakers. Therefore, if there is confusion about an issue or a lack of consensus from the conservation community, we do not include those votes in the scorecard. Statistical scores, however, are an incomplete report on the legislative record. Who sponsored the good and bad bills? Who fought in Committee? Who worked behind the scenes or spoke on the floor? To add some additional context, we are including a bump (plus or minus) for bill sponsorships. Not only does this show who doesn’t have your interests at heart, it highlights who is going the extra mile for conservation. The descriptions below describe the content of the bills, the process they went through, and the votes tallied in the following spreadsheets. Those votes are then averaged to produce the Legislator’s score. The Legislator’s lifetime score is a comprehensive score that incorporates every vote that a legislator has taken on priority conservation legislation during the time that they have served in that chamber.

2019-2020 Highlights

The 2019-2020 session was historic in many respects. In 2019, we passed landmark energy legislation with the unanimous passage of the Energy Freedom Act. We started out the 2020 legislative year excited about the breadth of pro-conservation, proactive legislation in both chambers filed by bipartisan champions like Senators Sheheen and Davis and Representatives Newton and Cogswell.

Unfortunately, the 2020 legislative year was cut short because of the COVID-19 pandemic, resulting in a fairly lean scorecard. However, we anticipate, and hope, much of the same pro-conservation legislation to be introduced again next legislative session.

Despite having less progress on our legislation and fewer votes than we wanted in 2020, you can still see that we overwhelmingly have a bipartisan conservation majority in the House and Senate. Legislators care about our South Carolina’s natural resources, and they want to protect their constituents from pollution. Legislators want to stop offshore drilling. They want to protect land for future generations. They want to work with us to secure a clean energy future.

Vote Descriptions

Senate Votes

H.4000 Amendment 29A – Stopping Offshore Drilling

4/17/19 Senate Vote: 40-4

Pro-conservation Amendment

After offshore drilling bills stalled in 2019, Senator Campsen wanted to make sure we at least had a way to temporarily block offshore drilling from occurring off the SC coast. South Carolina Senators overwhelmingly approved (with a vote of 40-4) a budget amendment to the budget bill, H.4000, that would block the permitting of onshore infrastructure needed for offshore drilling and seismic testing to occur.

The measure aimed to prohibit the industrialization of our coastline with onshore infrastructure needed to process, store, and transport oil pulled out of the ocean. We thank Senator Campsen for introducing the amendment with a long list of supporters - including Senators Bright Matthews, Malloy, Senn, Harpootlian, Setzler, and Davis, as well as Governor McMaster and Attorney General Wilson.

H.4000 Tabling of Amendment 84 – Attempting to Ban Local Ordinances Controlling Consumer Goods

4/18/19 Senate Vote: 27-15

Anti-conservation Amendment

During the Senate debate of the budget bill (H.4000) in 2019, Senator Massey proposed a budget amendment that would have prohibited local communities from adopting ordinances from banning consumer goods – including plastic bags.

Senator Massey's amendment was an attempt to circumvent the normal process for a bill to be approved by inserting it into the budget. Senator Massey had shepherded a bill (S.394) through committee that would have stripped communities of their ability to ban plastic bags, and he was frustrated that its passage was being stalled on the floor of the Senate.

Thankfully, Senators recognized this attempt to circumvent the normal process and defeated the budget amendment. Passionate speeches and debate were waged by Senators Senn, Davis, Johnson, and Campsen.

Ultimately, the amendment was stopped by a vote to “table” it, thus killing it 27-15. This vote serves as a useful indicator of which Senators support home rule and the right of communities to pass ordinances controlling plastic pollution.

H.3659 South Carolina Energy Freedom Act

(Third Reading) 5/8/19 Senate Vote: 46-0

Pro-conservation Bill

Introduced by a bipartisan group of House members in 2019, led by Rep. Peter McCoy, the Energy Freedom Act (H.3659) lifted the cap on solar energy development in South Carolina and opened up the clean energy marketplace. The Act addressed large-scale, commercial, and residential solar and renewable energy needs, as well as consumer protections. It established a policy of the State of South Carolina to promote solar energy and to ensure solar is accessible to all - regardless of income and home ownership. In addition, the Act deferred a number of long-term solar policy issues to the Public Service Commission.

With a lot of negotiating and time spent crafting the bill in the House Labor, Commerce, and Industry (LCI) Committee, the bill unanimously passed the House 110-0 and was sent to the Senate in early April of 2019

Senator Tom Davis had introduced the Senate companion bill (S.332) early in the 2019 session. Conversations surrounding S.332 had laid the foundation for quick consideration of the House version of the Energy Freedom Act by the Senate Judiciary Committee. After further negotiations and debate in the Senate Judiciary Committee, the Senate passed H.3659 with a unanimous vote 46-0, and the House concurred with changes.

The bill was signed into law by Gov. Henry McMaster in May of 2019.

House Votes

H.3659 South Carolina Energy Freedom Act

(Second Reading) 2/21/19 House Vote: 110-0

Pro-conservation Bill

Introduced by a bipartisan group of House members in 2019, led by Rep. Peter McCoy, the Energy Freedom Act (H.3659) lifted the cap on solar energy development in South Carolina and opened up the clean energy marketplace. The Act addressed large-scale, commercial, and residential solar and renewable energy needs, as well as consumer protections. It established a policy of the State of South Carolina to promote solar energy and to ensure solar is accessible to all - regardless of income and home ownership. In addition, the Act deferred a number of long-term solar policy issues to the Public Service Commission.

With a lot of negotiating and time spent crafting the bill in the House Labor, Commerce, and Industry (LCI) Committee, the bill unanimously passed the House 110-0 and was sent to the Senate in early April of 2019

Senator Tom Davis had introduced the Senate companion bill (S.332) early in the 2019 session. Conversations surrounding S.332 had laid the foundation for quick consideration of the House version of

the Energy Freedom Act by the Senate Judiciary Committee. After further negotiations and debate in the Senate Judiciary Committee, the Senate passed H.3659 with a unanimous vote 46-0, and the House concurred with changes.

The bill was signed into law by Gov. Henry McMaster in May of 2019.

H.4152 Pyrolysis

(Second Reading) 4/25/19 House Vote: 63-27

Anti-conservation Vote

Introduced by Representatives Hixon and other members of the House Agriculture and Natural Resource Committee, this bill sought to exempt pyrolysis facilities from existing Solid Waste Management laws.

Pyrolysis is the melting and gasification of plastics into other petroleum products, like jet fuel. While this process is already permitted in South Carolina under existing law, the bill sought to exempt these facilities from Solid Waste oversight.

The conservation community opposed the bill because of the lack of appropriate oversight of an unproven process, the lack of financial assurances to protect taxpayers if a facility contaminated the state or went bankrupt, and the potential to increase the import of out of state waste to satisfy the processing needs of the facilities. This bill had potentially significant and far-reaching impacts, but was complicated by plastic industry talking points that claimed that the process was “environmentally friendly” because it would keep plastic out of landfills.

This bill passed out of the Agriculture, Natural Resources and Environmental Affairs Committee in the House. There were significant concerns expressed on the House floor, with Representatives Will Wheeler and Mandy Powers Norrell leading efforts to amend and improve the bill. Despite their work, the bill passed out of the House 63-27.

The bill was then sent to the Senate. The bill received a hearing in the Senate Medical Affairs Committee, but did not progress to the Senate floor because of Senators’ concerns over the premise of a blanket exemption

H.3700 Seawalls (Sustaining of the Governor’s Veto)

5/20/19 House Vote: 43-60

Pro-conservation Vote

Introduced by Representatives Bailey and Hewitt, H.3700 sought to allow the placement of wingwalls at the ends of existing erosion control structures, like seawalls.

This bill was referred to the Agriculture, Natural Resources and Environmental Affairs Committee. The Conservation Community had no position on the bill as drafted because it did not allow for the construction of new seawalls or erosion control structures on our coast.

In the final days of the 2019 legislative year, however, Rep. Davey Hiott sponsored and passed an amendment to the bill that would have allowed the gated DeBordieu community to build a new seawall to protect 17 homes. This special interest provision would have undermined a 30-year prohibition on new sea walls along our coast and would have made it difficult to uphold critical legal protections for our coast. As a result, the conservation community opposed the bill as amended.

Without the time in the final hours of the legislative session to stop or amend the bill, the conservation community worked with Governor McMaster to veto this dangerous legislation. We applaud the Governor for taking this position in support of smart shoreline and coastal management protections. Supporters of the seawall legislation needed 2/3 vote of the House to over-ride the Governor's veto.

With passionate remarks from Rep. Mandy Powers Norrell and Rep. Justin Bamberg (and work from even more legislators behind the scenes), the conservation community was able to sustain the Governor's veto with a vote of 43-60, ensuring our state's seawall prohibition remained intact.

H.4940 Energy Market Reform (RTO)

2/12/20 House Vote: 81-31

Pro-conservation Bill

Introduced by Representatives Sandifer and Forrester, H.4949 sought to establish an electricity market reform study committee charged with assessing the ratepayer and clean energy benefits of various energy market reforms, including joining or creating a Regional Transmission Organization (RTO).

The conservation community believes that reforming the energy marketplace in South Carolina – including introduction of a RTO in SC – would introduce additional competition into the clean energy marketplace, incentivize cheaper and cleaner alternatives to traditional energy sources, and drive down energy rates for consumers.

After a short debate, the bill passed the House with a vote of 81-31 and was sent to the Senate where it stalled in the Senate Judiciary Committee.

H.4831 Wildlife Trading (Turtles)

2/5/20 House Vote: 100-5

Pro-conservation Bill

Introduced by Representatives Hixon and Ligon, H.4831 aimed to protect native reptiles and amphibians from the illegal wildlife trade, similar to efforts adopted in other Southeastern states.

This bill was referred to the Agriculture, Natural Resources and Environmental Affairs Committee. The Committee added an amendment that allowed DNR to establish possession limits for reptile and amphibian species. The committee then recommended the bill favorably to the House floor.

The bill passed overwhelmingly 100-5 and was sent to the Senate. The bill stalled in the Senate's Fish, Game and Forestry Committee.

Bonus Bills - stalled and un-scored bills that determine sponsorship bumps:

- **S.870** (Anti-Offshore Drilling) bans infrastructure for offshore drilling
- **H.3087** (Anti-Offshore Drilling) bans infrastructure for offshore drilling
- **H.5012** (Anti-Offshore Drilling – companion to S.870) bans infrastructure for offshore drilling
- **H.3471** (Pro-Offshore Drilling) requires permitting of infrastructure for offshore drilling
- **H.4809** (PSC Reform) lengthens the cooling-off period that a Commissioner has to wait before being able to take a job with a utility company from 1 year to 4 years.
- **H.4776** (PSC Reform) lengthens the cooling-off period that a Commissioner has to wait before being able to take a job with a utility company from 1 year to 3 years.
- **S.947** (PSC Reform) lengthens the cooling-off period that a Commissioner has to wait before being able to take a job with a utility company from 1 year to 4 years.
- **H.4260** (PSC Reform) Provides protections for employees of a public utility who report wrongdoing by the utility and to provide remedies for employees who are dismissed or suffer adverse employment actions because of a report or wrongdoing
- **H.3641** (PSC reform) requires the commissioners and their employees to attend at least six hours of continuing education curriculum; directs the office of regulatory staff to conduct certain examinations
- **H.5011** (Solar HOA) ensures homeowners have reasonable access to rooftop solar by arbitrarily limiting the ability of Homeowner Associations to create anti-solar restrictions.
- **S.1032** (Solar HOA) ensures homeowners have reasonable access to rooftop solar by arbitrarily limiting the ability of Homeowner Associations to create anti-solar restrictions.
- **H.4718** (PFAS Regulated by DHEC) requires DHEC to set safe limits for the amount of these toxic chemicals in our drinking water.
- **S.1111** (PFAS Regulated by DHEC) requires DHEC to set safe limits for the amount of these toxic chemicals in our drinking water.
- **S.394** (Plastic Bag – Ban on Bans) strips communities of their right to ban the use of plastic bags and auxiliary containers.

- **S.574** (Pyrolysis) states that pyrolysis facilities are exempt from state permitting under the Solid Waste Management Act.
- **S.107** (Dam Safety Rollbacks) would have removed over 1,600 low hazard dams from the State's dam safety program
- **S.1024** (Land Conservation – 30x30) establishes a state goal of conserving at least 30 percent of the land within South Carolina by 2030.
- **S.984** (SSO/Wastewater Notification) requires DHEC to provide public notice within 24 hours of a major spill
- **S.1021** (Illegal Dumping) seeks to increase penalties for dumping solid waste and litter on privately owned lands
- **S.1025** (Carbon Free by 2050) directs the state energy office to develop and provide recommendations to implement a plan to make all government operations carbon free by 2050
- **S.1022** (Organic Waste/Composting) directs DHEC to develop a five-year plan to reduce the state's production of organic waste
- **S.1023** (Microplastics) directs DNR and DHEC to conduct research into microplastic pollution
- **H.5420** (Surcharge on Coal Residuals) directs DHEC to charge a surcharge of thirty dollars per ton on any coal combustion residuals transferred to a landfill
- **S.1173** (Surcharge on Coal Residuals) directs DHEC to charge a surcharge of thirty dollars per ton on any coal combustion residuals transferred to a landfill
- **H.5125** (Land Conservation – 30x30 – companion to S.1024) establishes a state goal of conserving at least 30 percent of the land within South Carolina by 2030

We've included a key for better understanding the following spreadsheets:

+ : Pro-conservation vote

- : Anti-conservation vote

NV: No Vote – Failed to vote on the bill (counted as a negative)

EA: Excused Absence (not counted as a negative because the legislator was excused in the journal)

NA: Legislator was not a member of the body at the time of the vote

SENATE

"Lifetime" Senate scores have been calculated using only the 2011-2020 data. Not enough votes were recorded prior to 2011 to enable statistical scoring. Also, the Senate normally votes only after reaching consensus, leading to many 100% scores.
